SUMMARY

8th-semester Software Engineering student (UAEM) looking for a first position as a Java Trainee or junior full-stack developer. I designed, built and deployed Rutario, a school-internship attendance system with photo and GPS evidence that runs in production: API, web app, mobile app and operation on my own server. I care about software that leaves the lab: real users, bad connections, personal data and servers that need maintenance.

EXPERIENCE

Software developer (social service)

Jun 2026 – Nov 2026

CBT Lic. Julián Díaz Arias (technical high school), Chapultepec, State of Mexico

- Designed, built and deployed **Rutario**, an internship attendance system with photo and GPS evidence, designed for about 400 students in internships.
- REST API with Java, Spring Boot and PostgreSQL, with Flyway migrations; PWA web app with React and TypeScript; offline-first Android app with Kotlin, Jetpack Compose, Room, CameraX and WorkManager (sync queue, mock-location rejection).
- Six roles with permissions, Excel and Word reports, password resets and permanent deletion with access control.
- Security and privacy review: revocable JWT sessions (*token_version*), login rate limiting, forced password change, versioned privacy notice, 365-day evidence purge, security headers and encrypted backups.
- Deployed with Docker Compose and HTTPS through Caddy on a VPS; migrated to a new server with its own domain and upgraded nginx after a CVE.
- Built the school's institutional website with Laravel 12 and Filament 4. Work with *feature/** and *fix/** branches merged by pull request.

PROJECTS

- **UniConnect** · LinkedIn-style social platform with Java, Spring Boot, JWT, WebSockets, Cloudinary and SendGrid.
- **NexusTech University** · course platform with Spring Boot and Angular; Cloudinary, video upload and Thymeleaf emails.
- **RentAutos** · car rental with React, Vite and Laravel Sanctum; Google login and a pre-booking flow.
- **Language revalidation (UAEM)** · Laravel 12 and Livewire, roles, official-letter folios and PDF rulings. In development.
- **Click.com datamart** · Kimball star schema with PostgreSQL and Apache Hop on Docker.

EDUCATION

B.Sc. in Software Engineering, 8th semester
CU UAEM Tianguistenco, UAEMex

GIS, cartography and remote sensing courses at the Faculty of Geography, UAEMex.

LANGUAGES

Spanish · English (B1)

SKILLS

BACKEND	Java, Spring Boot, REST APIs, JWT, Laravel, Flyway
WEB & MOBILE	React, TypeScript, Angular, Kotlin, Jetpack Compose
DATA	PostgreSQL, MySQL, Apache Hop (Kimball)
OPERATIONS	Docker, Caddy, Linux, Git, application security
OTHER	Python, OpenCV, JavaFX, OpenMPI, GIS
